Product Name	Rattan Solar Lantern
Style	Nordic, vintage
Power Supply	Solar powered — no mains wiring

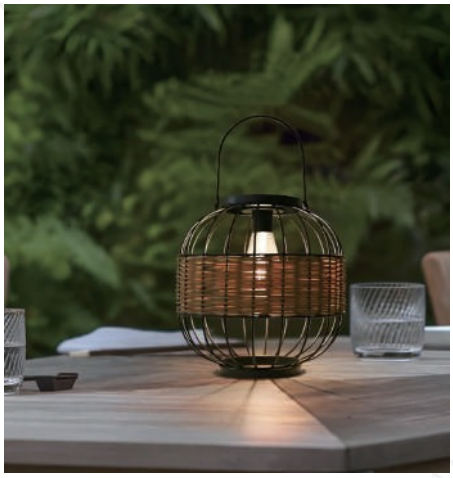

A rounded black metal cage wrapped in hand-woven rattan, with a vintage-style LED bulb inside that casts warm, patterned light across tables, decks and gardens.

A solar panel in the lid charges the lantern by day and it lights up on its own at night. A push button switches it off when stored. Warm White (3000K).

IP55 rated for outdoor use on balconies, lawns and yards. Stand it on a table or the ground, or hang it by its arched handle. No wiring needed.
