Product Name	Tree of Life Solar Lantern — Copper
Style	Retro
Power Supply	Solar powered — no mains wiring

A copper-finish iron lantern cut with a Tree of Life pattern that projects warm 3000K light and shadow across gardens, paths and tables.

A solar panel in the lid charges the lantern by day, so it lights up at night with no cables, no electrician and no running cost.

A sturdy wire handle lets you hang it from a branch, porch or balcony, or simply stand it on the ground or an outdoor table.
